QUICK SET UP INSTRUCTIONS GraverMach AT

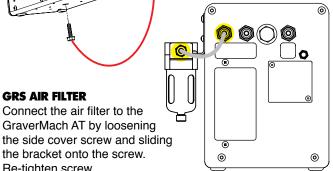

GRS AIR FILTER

Re-tighten screw.

Connect the air filter to the

the bracket onto the screw.

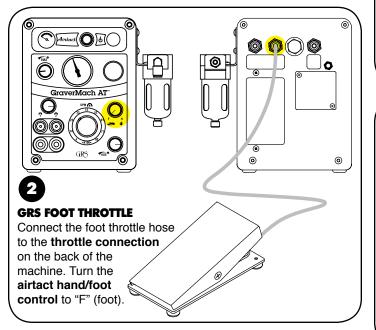

Remove the screw protruding from the bottom of the machine. Insert it with the washer into the rubber grommet located on the back of the machine.

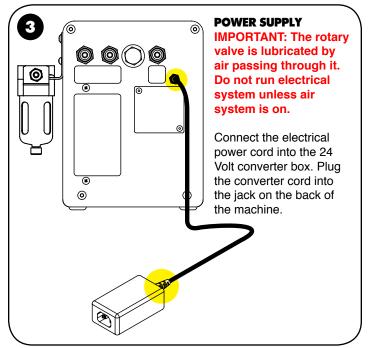

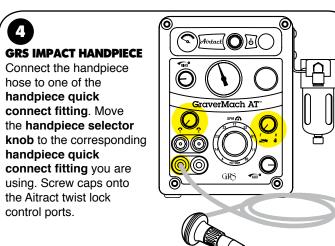

Find the black hose 139mm (5 1/2"). Connect one end to the air input quick connect fitting on the back of the machine and the other end to the straight quick connect fitting.

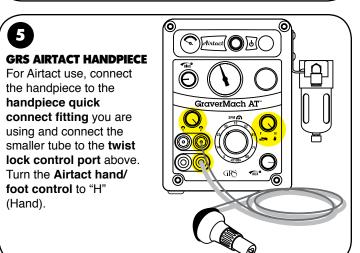

Connect the air compressor hose to the 90° quick connect fitting or the barbed fitting supplied.

NOTICE: This machine requires clean, dry oil-free air. We suggest using an oil free compressor. If your compressor is an oil type, you MUST have an oil removal filter, coalescing type (#004-579 or equivalent), in the air supply line to this machine. If you are unsure of this requirement, please call 800-835-3519 and ask for Technical Services. OIL CONTAMINATION IS NOT COVERED BY WARRANTY.

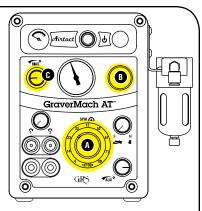

HANDPIECE TUNING

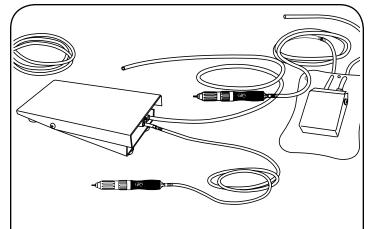

Move the handpiece selector knob to the corresponding handpiece quick connect fitting you are using. Set the stroke per minute (A) to 2300. Set the main air regulator knob (B) to 0.1 ~ 0.4 BAR (2~5 PSI). Close the bias control valve (C).

Hold the handpiece you have selected to use vertically, tool holder end up, next to your ear. Without depressing the foot throttle or palm control, SLOWLY increase the air pressure until the handpiece begins to buzz. Continue to increase the air pressure until the handpiece vibrates and knocks. Slowly add air pressure until the knocking stops. This is the perfect air

pressure for each handpiece. Now you are free to move the SPM (strokes per minute) dial to whatever setting desired.

ROTARY HANDPIECE

To connect a rotary handpiece to the GraverMach AT to the **auxiliary output quick connect fitting** the back the machine. Turn the **handpiece selector knob** to the center position. Turn the **autxiliary air open/close knob** counter-clockwise to allow air to flow.

SPECIAL NOTE: When using the NSK High Speed Handpiece do not exceed 2.5bar (35psi).
